

I just wanted to take this opportunity to contact you and let you know that I am against the NAB petition 04-160. I believe that XM satellite radio provides a very important service when they provide instant traffic and weather. I do not understand why this should be a problem. It gives me the answers I need when I am traveling and the answers are easier to get than trying to find a radio station or wait for the Weather Channel to finally get around to my local forecast or region.

Please continue to allow XM satellite radio to broadcast these very important updates. It is part of the reason I pay for my radio broadcasts. They give me what I need when I need it. They are vital, useful and ir-replaceable.

Thank you.

Sincerely,
Michele J. Martin
Cleveland, OH
